GET TOGETHER BANQUET

Improvement Club Hold Annual Meeting—Ladies Admitted to Membership—65 Enrolled

The Campbell Improvement Club observed its annual feast last Friday night. It was also the occasion of the annual meeting and the election of officers. This is the one meeting of the year when the Club has no difficulty in having a quorum in attendance.

The people of Campbell are strong on improvements when it applies to something good to eat. This is not intended as an insinuation that we are not well fed the year around.

For a number of years a few of the aggressive spirits have been meeting from time to time and discussing ways and means of getting more public improvements and encouraging individuals to work along that line. A great deal of good has been accomplished but not near what might have been done had there been some form of local government. As the time for the annual feed drew near this year it was suggested that it would be an improvement to have the new citizens of the community represented at the festive board, therefore a general invitation was sent out and the result was just double the number present as were there last year. The banquet was held in the new Coffee Club building, under the supervision of Mrs. A. Y. Hoag. At 7:30 o'clock, with eighty-three representative men and women of the community assembled around the long tables, the following menu was served:

Roast Chicken Chicken Pie
Potatoes and Gravy
Dressing Cranberry Sauce
Salad
Boston Brown Bread Rolls
Pickled Beets Olives Sour Pickles
Salted Almonds Salted Peanuts
Pumpkin Pie Fruit Mince Pie
Coffee Cake

After an hour of hard work on the part of everybody—including the waiters—the president, John F. Wilson, called a formal meeting of the Club. There being little business to attend to the election of officers was at once proceeded with. Mr. R. K. Thomas and John F. Wilson were nominated for president. Mr. Wilson declined and Mr. Thomas was unanimously chosen. There were five nominees for the honors of vice president: Mr. Wilson, Mr. Wade, Mrs. Waite, Mr. Shelly and Mr. Whitman. Mrs. Waite received a majority of all the votes cast on the first ballot and was therefore declared elected. Mr. Warren Shelly was elected secretary and John F. Wilson treasurer.

Mr. Shelly then spoke of the necessity of having an enrolled membership. A motion to that effect was made and carried. The annual dues was placed at twenty-five cents a year.

Mr. H. G. Keesling, who has done so much to help improve the beauty of the valley, was present and asked to speak on highway improvement. Mr. Keesling said it was the long hot drive to Pacific Grove without a shade tree along the road that inspired him to start the movement that has resulted in planting native black walnut trees from San Jose to Gilroy. He thinks that if we all get interested and do our part, by the time of the 1915 fair this valley will be the talk of the world. If every woman in the Club would plant a package of petunia seeds and see that the shoots were placed along the highways we would have more than enough for all the roads in the community. Mr. Keesling has tried planting potatoes, beets, corn and hay by the road sides but found that people would not let them alone. However, they would not steal flowers. They seem to have a civilizing influence on people. Planting flowers along the roads will induce people to travel that way and will also

S. R. WEEKS JAS. KELLEY

Local and Personal

Some how, Dear, I enjoy trading at Putnams the best.

Roy Sawyer went to Oakland last week to engage in the real estate business.

Herbert R. Gard is home from Tracy to spend the Holidays with parents and friends.

Mr. and Mrs. E. A. Sargent will go to Oakland tomorrow for a visit of a week or ten days.

The W. C. T. U. will meet in the Coffee Club on Wednesday, December 27th at 2:30 o'clock.

The high school closed Wednesday until after New Years. The grammar school closes today.

Mrs. Olsen and little daughter will spend Christmas with the former's mother, Mrs. Nelson.

STENCILING—A fine line of designs to select from. Mrs. H. M. Parker, over Rochdale store, Campbell.

If, Girls, you want to tickle the men folks buy one of those lovely Combination boxes of silk hose and tie to match, from Putnams.

Mrs. John Lancaster is spending a few days with her son Sidney and wife at Hollister. Sidney, a former Campbell boy, has a good position with the S. P.

Mr. Antone Beryessa with his wife and two children, have moved here from Plumas Co., and expect to make this their home. Mr. Beryessa is a brother of Mrs. Jack Fore.

FOR SALE OR EXCHANGE—A good bakery business, worth \$4,000, daily receipts from \$50 to \$60. With all modern machinery. Will exchange for country property. Apply to G. G. NICOL.

Kelley & Weeks are arranging splendid holiday decorations in their market. Mrs. Kelley is directing the work. Don't fail to see their choice line of meats for the special Christmas trade.

If, Boys, you want her to feel real good buy one of these beautiful boxes of Stationery at Putnams.

The Methodist Sunday school held stocking filling exercises last evening when many full stockings were prepared and sent to certain worthy poor children in San Francisco. A good program was given.

greatly increase the value of their property.

Mrs. C. H. Whitman spoke of the need of a curfew ordinance and expressed the hope that such a law could be enacted through the supervisors of the county. The court records in other places show that a much less number of juvenile offenders come before the courts where the curfew law is enforced.

Miss Mary Lewis gave some good suggestions regarding painting houses in harmonious colors, etc.

When B. O. Curry was called upon to tell what incited him to put up the beautiful new building, he said he thought it time for Campbell to do something.

Professor J. F. Smith said there was more marked improvement in Campbell during the last year than any previous year. He suggested the organization of a library district and the erection of a five or six thousand dollar building by the County Woman's Club on the fine lot.

Jos. Bohnett, who has been here for the last forty years, made some practical and witty remarks, speaking especially of the inventions and improvements that have changed the customs of our people. Years ago a young man went to see his sweetheart throughout dust up to his shoetops. Now he goes on a motorcycle or bicycle and before he enters her door takes out a handkerchief and wipes the dust from his patent leather shoes. Mr. Bohnett's little speeches always make good sauce.

Professor Graves endorsed the practical suggestion of Mrs. Whitman that a curfew ordinance be enacted for this town.

The following persons present at the banquet signed the roll of membership in the Improvement Club:

A. W. Adams F. B. Olmstead

Campbell Wins Both Debates

The debate last Saturday evening between Campbell and Palo Alto high schools resulted in a victory for Campbell at both places. We were promised good article of the events but it has failed to come in.

Death of Homer Craig

Just after making a short speech from the floor at a convention in Santa Rosa last Tuesday Homer A. Craig died of heart trouble. The funeral services are being held at his Berkeley home today.

F. Brown and family this week moved to Melrose, 1340 Fifty Third street. All but Ira left here yesterday, and he will go Saturday. Their many friends regret to see them go.

Miss Elizabeth Sargent returned to Oakland yesterday after two weeks visiting with her parents here.

MANY USES OF THE MAGUEY

Species of Cactus That Supplies the Mexicans With Medicine, Drink and Fiber.

In Mexico there is a plant that feeds a greater number of persons in more different ways than is known perhaps in any other country of the world.

The maguey is a species of cactus which thrives in profusion on the great mesa of the republic of Mexico. It is perhaps the most remarkable plant, as regards its utilization, of all the more common tropical plants on earth.

In this country a plant of the same family is known as the century plant, but of course the variety in Mexico is different, and here apparently the plant is used for ornamental purposes.

This plant throws out tiny sprouts with from five to eight branches edged with small spines, or needles, which identify it as of the cactus family. It does not attain to its full growth until its fifth year, but it may be made useful two years earlier. In its third year one or all of its branches are tapped, making cavities in the sides of the branch in which the sap or juice of the plant collects.

This latter liquid is what is known in Mexico as aqua miel, an efficacious medicine in many disorders of the human system, but it must be used as such the first day after it is picked. If allowed to stand fermentation takes place and the aqua miel changes into what is known as the most common of the intoxicating drinks of Mexico—pulque.

When distilled, pulque is the great national drink of Mexico and is known as mescal. The mescal distilled in the state of San Luis Potosi is regarded as the best quality and is called tequila.

It is not only in its medicinal and drinking qualities that the maguey plant is useful. It is one of the most important fiber plants in Mexico, and is utilized in the weaving of baskets and clothing. It is a tough fiber, but as flexible as a linen thread.—Washington Post.

Sea Serpent Washed Ashore.

The skeleton of a sea serpent recently washed ashore on Catala Island, off Vancouver Island coast was brought to Seattle last week, to be prepared for shipment to the Smithsonian Institution museum. The denizen of the deep seas had been dead but a short time. If real live specimens of this species of semi-fish and semi-serpent are still inhabitants of the North Pacific Herbert Webb and party from the Washington State university will attempt to find them.

Capt. J. T. Walbran of the United States revenue service saw the strange creature through his glass and went ashore in a small boat. The skeleton is 16 feet long and 12 inches in diameter. The eyes are still in their sockets and are as large as apples. The top of the head was still covered with coarse brown hair. The teeth, about an inch long, are like miniature saws and are hinged where they attach to the jaw bone, thus enabling them to work crosswise, after the manner of scissors. The skeleton is one of the most remarkable ever found on the Pacific coast and is a specimen of a rare and strange sea monster. Chinamen at Seattle state that on the coast of South China smaller, but similar, fish are seen during the season when typhoons are prevalent.—Exchange.

This Congregation Was Punished.

The "Bluecoat Boys" of an older time had worse things to complain of than hard discipline and poor food. Since the day when "Christies hospital erected was, a passing dode of pittle," they have had their grievances. And they were fated to hear probably the longest sermon ever preached from any pulpit. It was in 1671, and the preacher was Isaac Barrow. He subsequently published the sermon, and it runs to 230 pages. Its subject was "The Duty and Reward of Bounty to the Poor," and Tillotson has said of it that "it seems to have exhausted the whole argument and left no consideration belonging to it untouched." No one will be likely to quarrel with that statement. But there would have been some excuse for a school boys' strike in those days.—London Chronicle.

Paper and Ink for Our Money.

The materials that go to make up our paper money are gathered together from all parts of the world. Part of the paper fiber is linen rag from the Orient. The silk comes from China or Italy. The blue ink is made from German or Canadian cobalt. The black ink is made from Niagara falls acetylene gas smoke, and most of the green ink is green color mixed in white zinc sulphide made in Germany. The red color in the seal is obtained from a pigment imported from Central America.—Scientific American.

Plumb Line Into Porto Rico.

There are places where the direction of a plumb line is not vertical. Irregularities of density in the crust of the globe may produce this phenomenon. A remarkable instance in point was found in the island of Porto Rico, where the deviation from the vertical is so great that in mapping the island the northern and southern coast lines, as shown in the older maps, had each to be moved inward half a mile.—Scientific American.

FEEDING GRAIN TO CHICKENS

Some Varieties Are Particularly Useful in Forming Fat and Others Muscle Tissue.

Experimentalists say that peas, beans, wheat, oatmeal and some other vegetables contain much flesh-forming substances, but it is difficult to say what proportion of them should be used or what quantity given without doing mischief. There are certain feeds that give warmth and aid respiration, and certain kinds that restore the muscular waste of the matured (or increase the bulk of the growing) animal. If we give only warmth-producing substances the consumers will fall in the increase of bone, muscle, etc., and if we give too much flesh-producing nourishment it goes to waste or becomes injurious.

The science of feeding is one that must be studied carefully if success is desired. To underfeed is as bad as to overfeed. To give carbonaceous food when nitrogenous elements are necessary, and vice versa, will do more harm than good. Feed for the object desired, and never allow the fowls to become over fat. With proper feeding goes exercising, for without proper muscular movements the digestion will be defective, and no good results can be expected.

French poultrymen believe in boiling the grain. It is put in a pan of water and boiled until soft enough to be easily bruised between the fingers. It is claimed that four pints of oats boiled will fill a pint measure ten times, four pints of buckwheat boiled will fill a pint measure 14 times, four pints of corn (maize) boiled will fill a pint measure 15 times, four pints of wheat boiled will fill a pint measure 10 times, and four pints of rye boiled will fill a pint measure 15 times.

Corn contains 86 per cent. fat and heat elements, hence is no egg food. We must not gauge economy by cheapness. Corn may be the cheapest ration as dollars and cents are concerned, in its market value, but it undoubtedly is a dear egg food, for it cannot produce what is wanted. Farmers have the idea that corn will make eggs, and for proof point to the fact that their hens get nothing else, but they forget to note that their stock are allowed perfect freedom, that they gather much in their foraging trips. Worms, bugs, grass, wheat, oats and what not are found on the daily trips of the feathered tribe. So it is not the corn, but the variety of other food the hens collect that makes eggs, and the former gets the credit. The cheapest egg food, then, is that which gives us the most eggs: such a quantity of food, too, as will be thoroughly digested and assimilated.

Oats Straw for Sheep.

It is an excellent plan for every farmer to put up every fall a quantity of oat straw to help out in carrying the sheep through the winter. Wheat straw will answer the purpose, but it is not as good as oats straw.

Of course, straw is not an ideal feed for sheep. It contains a little nutriment, but not much, and a great deal of food fiber, but clean oats straw fed sparingly in connection with roots and other succulent feed helps out wonderfully.

Placed in the rack with clover hay it will be pretty well eaten up every day, and it undoubtedly saves some grain.

Where a farmer has plenty of grain and little roughage oats straw will help to piece out the ration admirably.

If fed in large quantities it will almost certainly produce stomach trouble, and this should always be avoided.

Securing Good Butter.

When securing good quality of butter it is important to get the milk clean. The butter should not be over churned, but stopped as soon as there are grains like wheat, not bringing it together until after it is washed. After drawing off the buttermilk add water, ice water if possible, and turn the churn slowly for one minute, draw off the water, add fresh water and turn again, repeating the operation until the water runs off clear. The butter will be in grains ready to salt and work. It should be worked just enough to get out the streaks without breaking the grain. Butter utensils should be kept very clean.

Temperature of Dairy.

Bacteria do not thrive in the cold, but in heat only. If you keep your milk below 40 degrees the bacteria will have a small chance.

The dairy cannot be managed just right without the use of a thermometer—and it must be a good one, no 25-cent affair.

Raising Cattle.

The most important factor in the raising of cattle is their care while young. Do you think you are doing the correct thing if you are only managing to keep the life in the calf until it is three months old, and then have it get fat on grass before the winter comes?

Clearing Up Orchard Litter.

Care should be taken to remove all weeds, grass or other matter which might harbor mice. It is frequently advantageous to wrap the tree trunks with wire netting, tar paper or thin boards to protect them from mice or rabbits.

Gathering the Windfalls.

Keep the windfalls in the plum and apple orchards picked up. They often harbor insects. Pigs turned in among the trees will rid the ground of windfalls. If they are fed occasionally there is little danger of their injuring the trees.

THE INTRUDERS

By ANNIE HINRICHSSEN

(Copyright, 1921, by Associated Literary Press.)

"It is my island," she said. "I beg your pardon for the contradiction," said the young man firmly. "It is my island."

"My father left it to me."

"My uncle left it to me."

"You have camped on the wrong island. There are hundreds of islands in the river. You have chosen, by mistake, one which belongs to me."

"My uncle's descriptions were very vivid. His island was a long, narrow one with a cabin at each end."

"My father's island was a long, narrow one with a cabin at each end. Were you ever here with your uncle?"

"No. Were you ever here with your father?"

"No. But I am sure this is my island."

"I am equally sure that it is mine. I have no objection, however, to your using the cabin you have chosen as your home."

"You have my permission to remain in the cabin in which you are living. It is my property, but I shall permit you to remain there."

The young man clenched his teeth on the stem of his pipe and stared wrathfully out at the river. The girl watched his handsome, wrathful profile.

"Why did you come here?" she asked presently.

"A man has a right to visit his own property. Why did you come?"

"A woman has a right to spend a few weeks on her own estate. I came here because I was tired of people and places. My father bought this island years ago and built the two cabins. I brought my housekeeper and a quantity of supplies and came here to spend a month."

"I came here for a rest and for the fishing. I thought I should find my island unmolested by intruders."

"I am not an intruder." She rose to her feet and stood looking down at him. Her white linen hat was pushed to the back of her head and her reddish brown hair waved about her tanned forehead. Loose strands of it blew across her dark eyes and on her

She Sat Up and Listened.

rounded cheeks. "I shall return to my cabin," she announced. "If at any time you wish to consult me in regard to matters such as a tenant usually desires to discuss with his landlord you may communicate with me. Otherwise, do not address me."

The young man jumped to his feet. "Oh, I say, Miss Sheldon," he pleaded, all the wrath gone from his face. "don't be cross just because I insist that I own this island. Won't you come out for a row with me? The water is fine and I'm awfully lonesome."

Miss Sheldon looked from him to the river. The setting sun threw a golden light over the river and the trees. The steady, soft lapping of the water on the sand, the occasional call of a bird, the splash of a fish were the only sounds on the island. She looked back at the young man. "I'll go," she agreed.

A week later they were sitting on the sand at the water's edge near the cabin.

"Ethel," he said, "these have been glorious days. We came here strangers to each other and now—"

She shook her head slowly. There were tears in her eyes. "We quarrel all the time," she began.

"Only on one subject," he interposed.

"But we shall never agree on that one. I claim the island; so do you. I don't care for the property. But the serious fact is that we cannot compromise. Neither will yield to the other. Just now the island is the cause of disagreement between us. Later something else will be equally provocative of trouble."

"I'll deed you the island and then we need never quarrel over it again."

"It is not yours to give away. It is mine and I shall give it to you."

"You can't. It is mine and I shall give it to you for a wedding present. We'll come here every summer after we are married."

"We shall not be married. You may have the island. I shall give it to you. But a marriage between us is impossible. You are too obstinate, too unwilling to acknowledge your mistakes—" A moment later her cabin door

slammed, but Bertram Hay was walking so rapidly toward his cabin that he did not hear it.

That night Ethel Sheldon was awakened suddenly. Some one was shaking the door. She sat up and listened. The housekeeper slept soundly. The shaking continued. Heavy blows were struck on the door. There was a growling of men's voices. A man's head appeared at the window and then vanished. The attack on the door ceased. There were footsteps on the sand and then the rattling of oars and the swish of a boat.

Ethel ran into the next room and shook the housekeeper into terrified wakefulness. Two frightened, hastily dressed women ran down the beach to the other cabin half a mile away.

At the first call under his window Bertram staggered up and threw on his clothes.

Far down the river they could hear the regular dip of oars. The boat was going toward the town, two miles in the distance.

Bertram rowed Ethel and the maid back to their cabin. "I shall sleep in the hammock on your porch the rest of the night," he announced. "You will rest better if you know there is a protector on guard."

The next morning a skiff landed before Ethel's cabin. A man wearing on his fannel shirt a well-polished star stepped from the boat.

"I've brought you notice to move," he announced. "The owner of this island wants to move in and you young folks are to leave."

"The owner?" The question came from two pairs of lips.

"Mr. John Brown owns this island. He came here with some friends last night and found his cabin occupied. He banged on the door and nobody answered. One of the men looked through the window and saw in the moonlight a young lady looking scared to death. They all left then and rowed back to town. Mr. Brown sent me out this morning to tell you folks he'd like his property."

"But it's my island," exclaimed two voices.

The officer of the law grinned. "There are lots of islands around here," he explained. "None of 'em are worth much, under water half the time, and people camp on 'em in the summer and are not too particular about whose islands they help themselves to. Why don't you folks camp on your own islands? You've each got one with two shacks on it. Miss Sheldon, yours is a mile north of the town, and Mr. Hay, yours is just beyond the next bend of the river."

After the officer had gone they sat for some time in silence.

"It is not my island," said Ethel. "It is not my island and I am glad of it. The cause of our trouble, the ownership of the island, is gone—it never existed."

"But there would be something else."

"It would vanish as this has done. Besides, you need me or you would not have run to me last night when you were frightened. You need a protector."

"A landlord may go to a tenant for help—" But the rest of the sentence was an unintelligible murmur against his coat.

USE FOR OLD MAGAZINES

Discarded Periodicals Serve as Amusement for Children, and for Decorative Purposes.

A great deal of good can be done with old magazines after the family have finished reading them. Let the children in the family, or in your neighbor's family, have the magazines from which they are allowed to cut pictures for paper dolls, scrapbook or toy furniture. Cut out all interesting articles that you will wish to refer to in the future and paste them in a scrapbook for that purpose. Pictures that are good enough to be kept lay away in a flat box; some of these may afford the children or yourself a great deal of happiness in framing or for decorative purposes.

One woman has her attic bedroom papered with good pictures cut from magazines. They are arranged in an artistic manner and are the joy of all the children in the neighborhood, who delight in hearing her weave romances about each picture.

The cup-and-magazines are then relegated to the kitchen, where they are used to rub off the hot irons or as a pad under hot pots and pans that are taken from the stove and set upon the table.

When the pages are scorched or soiled they are torn off and thrown away, leaving a clean one underneath. Lastly, they are used to start the fire or to produce a little extra heat for the browning of a cake if the oven is not quite hot enough.

And Mispronounced at First.

Brevity is not so much a characteristic of American speech as might be supposed. Let me quote one example. In England we choose the short, but I will not plagiarize and say uglier, word "motor," whereas in America the word "motor" is never used, but the longer and more difficult one "automobile" is.—Rev. Dr. John Clifford of London

GOOD FERTILIZER FOR WHEAT

Ten Per Cent. Phosphoric Acid and Six Per Cent. Potash Makes Excellent Combination.

There is an impression among the farmers generally that a fertilizer should be especially rich in potash.

One cause of this is no doubt from the marked effect that wood ashes has on most soils.

A liberal application of wood ashes shows an improvement in crop production on almost any soil.

This is usually attributed to the potash contained in the ashes.

An analysis of the ashes usually shows from four to five times as much lime as potash in the ashes, since wood ashes usually contain from five to eight per cent. of potash, 35 to 40 per cent. of lime and about two per cent. of phosphoric acid.

The marked effect that wood ashes has on almost all plants of the leguminous family seems to indicate that the lime in the ashes has more influence in making the ashes valuable as a fertilizer than the potash does.

Last year our fertilizer dealer put in a bag of fertilizer containing 10 per cent. of phosphoric acid and six per cent. of potash at the same price as the goods I was buying which was a 14 per cent. available phosphoric acid goods on condition that I would use it on wheat and compare them, side by side.

I put the bag of fertilizer which contained the potash in my grain drill and when it run out I continued with the superphosphate containing 14 per cent. available phosphoric acid without changing the quantity per acre.

There was no perceptible difference in the growth of the wheat during the growing season. The wheat ripened by June 25. There was no difference in the time of ripening. I could see little or any difference between the wheat with and that without the potash.

I showed the wheat to several farmers and all agreed that if there was any difference between the two plots that it was in favor of the wheat where the 14 per cent. phosphoric acid without potash was applied.

A Special Curing House.

The only proper way to handle any amounts of seed corn is by the erection of a special curing-house. This need not be very expensive, as it is a simple building placed on concrete piers, over which pans have been inverted to exclude rats and mice. Sills, either of solid timber or built up, may be of any material, although neither they nor the girders which carry the joists should be of poor quality. There is no necessity for mortising and tenoning. The floor should be good and tight and drop siding is the best material for the walls. Any watertight material may compose the roof. A chimney should be built at one end and a small steel stove placed at the other to supply enough heat to dry the corn quickly. Plenty of windows and ventilating slides should be provided in the walls. Anybody at all skilled with tools can put up one of these drying-houses for the cost of materials and his own time.

Value of Alfalfa.

Alfalfa is one of the best friends the farmer has from any point of view. It not only encourages a man to free his land from all noxious growth, but as it is cut so frequently during the growing season, no weeds go to seed. If now and then unwelcome visitors put in an appearance, they come to an untimely end without being permitted to mature their seeds. Chemical analysis testifies as to the high feeding value of this crop. In fact, it is such a fine crop to raise that it fully justifies all the pains, preparation and price paid for it. With 100 head of well-bred pigs and 15 to 20 acres of good alfalfa a man can soon establish a good bank account and make an easy living.

Adaptability of Silage.

The idea used to be that silage was altogether a dairy feed suited alone to the palate and the requirements of the dairy cow because it made her give an increased flow of milk. That idea is now routed and more and more beef cattle breeders and feeders and sheep farmers are coming to realize great value of this succulent feed in reducing the cost of feeding their herds and flocks and in keeping them in a more thrifty and better breeding condition.

Demand for Horses.

Notwithstanding the extensive use of the steam cars the great increase in the trolley lines, all of which are well patronized, the advent of automobile that is utilized to such an extent that it is the "car of the million," good horses that are well proportioned and present a comely appearance bring good prices. In fact, at no other period in the history of the country have good horses paid better profits over and above the expense of raising them than at the present time.

Checking Cow's Performance.

Every dairyman should get a pair of scales that can be conveniently hung near the cows and weigh every milking and mark it down. It only takes a few minutes and gives an exact record of what the cow is doing every day.

Scours Is Germ Disease.

As scours is a germ disease, it is important that the calf be free from this disease when born.

Dairy Barns.

A dairy barn can be kept practically free from unpleasant odors, but we never saw more than a dozen such barns

DICKING A PRESENT FOR PLATT

By DOUGLAS MALLOCH

HEN Harry Platt and that girl friend of the Greens (I forget her name) were married, it was one of those my-goodness-gracious-just-think-of-that affairs, with no one in

on the secret except the suburban minister who tied the knot, the cabman who drove them out there and the girl from the minister's kitchen, who was a witness, and left a thumb-print of grease on the certificate (she was frying doughnuts at the time) and the minister's wife (at least the name was the same). Let's see, where was I? Oh, yes, when the Platts were married, it being that kind of a wedding, there was no chance to send them a wedding gift as I would have liked to do, or to have done, (whichever is proper, or grammatical, though I'm sure I can never tell which). But Mr. Platt is one of the nicest men in the office, that is, he was before this happened. So I felt we ought to do something for him, just to show our good will—and, anyhow, we've dug down for others we thought much less of, so why shouldn't we for him? But the wedding was over, without invitations, or even a reception, and they were housekeeping before we knew it. So what could we do?

Well, just then Christmas came along not just then but two months after the wedding. They were married October 29, so it wasn't quite two months, but that's close enough. When Christmas came along, that is, just before it came along, I suggested that we make up a purse and give them a sort of delayed wedding present, just to show our good will. Everybody thought it was a splendid idea, that is, of course, except Mr. Platt, whom, of course, I didn't consult. So I got up a subscription paper and went to everybody in the office (except Mr. Platt, of course). I got \$26.60, including ten cents from the janitor, who wasn't expected to give anything but wanted to give something, which shows just how popular Mr. Platt was with everyone in the building, when a janitor even would chip in.

Christmas shopping is hard enough, goodness knows, when you do it for yourself; but when you do it for a stock company capitalized at \$26.60, with 28 stockholders, with 28 different kinds of ideas and tastes, then Christmas shopping rises above a mere annoyance to the dignity of a real trouble. And that's what I was up against. I thought it would be nice to get an expression of opinion. So I went around one morning and asked for ideas. But I couldn't get a word. Nobody could think of anything. I couldn't myself. At noon I went out and looked. I walked miles. I priced, then I went back to the office. You should have seen my desk. Honest, you would have thought some one had turned in a general alarm. They couldn't wait for me to get back. There they were—28 of them, (that is, 27, or 28 with me). They all had suggestions, and they were all different.

The head book-keeper thought an arm chair would be nice. (He stands up all day). The collector thought a raincoat would be best, while Miss Jones suggested a dress pattern. They all said, of course, that they left it entirely to me; and then each went away sadly, as much as to say that he hoped I wouldn't be so foolish as to buy any of those other things that the others had proposed.

The next day I looked again. But either a thing was too expensive or I would have money left. It is remarkable how few things there are, in the world you can buy for \$26.60, no more, no less.

And then I saw it. It was in a department store, and marked down from \$50 to \$26.60! There it was, a cent! A great, big, glittering, magnificent Punch Bowl! Nobody had thought of that!

But, to make sure, I sent the sales ticket with it and told the Platts they could exchange the punch bowl, if they wished, for something they liked better.

And what do you suppose those Platts did?

In January they traded in that magnificent punch bowl for three tons of coal!

Rheumatism

Is A Constitutional Disease.

It manifests itself in local aches and pains, inflamed joints and stiff muscles—but it cannot be cured by local applications.

It requires constitutional treatment, and the best is a course of the great blood purifying and tonic medicine

Hood's Sarsaparilla

which corrects the acid condition of the blood and builds up the system.

Get it today in usual liquid form or chocolate tablets called **Sarsatabs**.

Ingenious Old Clock.

Wells (Eng.) has a wonderful clock one of the oldest in the world, which dates from 1325. When it strikes the hour four knights on horseback go riding round, and the seated man kicks two small bells with his heels, as he has been doing every fifteen minutes for nigh on six centuries. This clock was the work of Peter Lightfoot, another monk of Glastonbury.

FREE TRIP TO MEXICO

A ticket to go and see our lands at our expense. Join our next excursion, January 10. Wonderful inducements await the investor, farmers, fruit growers and lumbermen. Ideal climate. Lands from \$1.00 to \$10.00 per acre, on time. For further information address:

Pacific Coast Colonization Company
719 Phelan Building San Francisco, Cal.

Beats Record of Cats.

A lady on being fined five shillings lately at Limerick (Ireland) for not having taken out a dog license stated the animal had been drowned 99 times but "had come back to life again."

The most profitable pork is produced by using as largely as possible other feeds than corn.

MEXICAN MUSTANG LINIMENT

FOR RANCHMEN.

H. L. Corbin, So. Platte, Colo., writes:

"I am a stockman here and if you lived near I could give you a box of Mustang Liniment. It has cured my horses and cattle. We ride pretty hard here in the Rockies but Mustang Liniment fixes the horses good as ever."

FOR LIQUOR AND DRUG USING

Over 20 years of continuous success. Call or send for printed matter.

THE KEELEY INSTITUTE
2930 Sacramento St., cor. Broderick, San Francisco, Cal.

He Still Lives.

Charles Stillwell is the name of a lad at Jackson, Miss., who walked on the railroad track and was struck by a passenger train. He was thrown a distance of 55 feet by actual measurement and he landed on his head in a cornfield. If you think that did the business for him you are greatly mistaken. He shed a few tears, went to bed for a day and then got up and split some wood and feels all right again.

TO VISIT SAN FRANCISCO

Without seeing A. Andrews' Diamond Palace would be like visiting Europe without seeing Paris. It is the most magnificent jewelry store in the world. Visitors welcome. 50 Kearney street, near Market street. Catalogue sent on request.

Ocean Always Cold.

The great bulk of the water in the oceans is always cold. Only the surface is ever warm, even in the tropics. The depths know nothing of the heat of the sun or the changes in the seasons.

Girls, Take Notice!

A wealthy Yonkers (N. Y.) man has just married his housekeeper because she made such capital apple pies.

FOUR YEARS ON 'ROAD

NEW JERSEY YOUTH HAS MOST REMARKABLE EXPERIENCE.

Leaving Home With 73 Cents, James O'Neill Worked at Almost Everything Imaginable in All Parts of the Country.

Four years ago James O'Neill left his home at 254 York street, Jersey City, with exactly 73 cents in his pocket. Before he returned to his home a few days ago he traveled all over the country and had a working experience in countless capacities in nearly every large city in North America, where most of the time was spent. He is now working in the auditing department at the Waldorf-Astoria and he declared that it felt good to be home again, says the New York Herald.

"Since I've been away," he said, "I have worked at everything imaginable, from managing a five and ten cent store to waiting table in a tea garden in Japan. I never knew there were so many different ways of making a living until I got away from home. I learned, too, it doesn't pay to be particular if one wants to eat regularly."

"I had some amusing and likewise tragic experiences. In Portland, Ore., for instance, I was floor walker in a bird store. That was tragic, for I was discharged for eating bird seed. It looked as good as breakfast food to me, for food and I had been on the outs for several days before I got the job."

"At a lumber camp in Canada I got into a shooting scrap and nearly lost my life. A French-Canadian, with whom I had several disputes, became intoxicated one night and fired three shots at me. His aim was unsteady and the bullets went wild, but they whizzed uncomfortably near my head."

"I had another narrow escape when two of my companions were killed within 40 feet of me as we were stealing a ride on top of a freight train in New Hampshire. The accident happened about midnight and I did not know they were dead until their bodies were found by the trainmen at daybreak. They had been struck as the train entered a tunnel. I remembered hearing some one ahead shout a warning. I fell flat on top of the car as the train whizzed into the tunnel, and that saved my life."

"I wanted to see the world, particularly this country, and I did not remain long in any one place. I did not have a trade and it is easy to understand I was called upon to do many things to earn a livelihood. I herded sheep in Montana, stood a watch in a New Mexico concert hall, worked for a florist and billboard poster in Los Angeles, peeled potatoes on a lake steamboat between Milwaukee and Chicago, sold real estate in New Jersey, was housekeeper on a Texas ranch, drove mules in a Pennsylvania mine, clerked in a coffee shop in New Orleans, worked in various hotels in Florida, harvested in North Dakota, managed a novelty store in Evansville, Ind.; worked in a blacksmith shop in Ohio, was a farm hand in Missouri, worked in a distillery in Illinois, groomed horses in Kentucky and put in time in a sawmill in Tennessee."

Mr. O'Neill said he did laundry work—his own—in creeks and streams in nearly every state in the Union. He is proud of the fact that never once in four years of roving among strangers was he obliged to beg for food. He did not communicate with his family while he was away, and an otherwise happy home-coming last week was marred when he arrived and found his father died a year ago. He considers his world-wide experience invaluable, but says he will never leave here again, except on the "dollar excursions," limited to two days.

Duck's Immunity to Snake Poison.
Experiments by M. L. Billard and Maubiant, recorded in the "Comptes Rendus" of the Biological society of Paris, shows that the common duck exhibits a remarkable indifference to the venom of the viper. They also find that the owl is similarly immune. Two of these, badly bitten on the feet, did not seem much worse. M. Billard also finds that the domestic cat has almost complete immunity as regards the viper.

Russian Wealth Unevenly Divided.
Income tax statistics for the czar's subjects show that of the empire's total population of 16,000,000 only about four hundred thousand have income running from \$515 to \$1,030 a year. On the other hand, 3,500 subjects have an aggregate of yearly incomes amounting to about \$277,000,000, very nearly as much as the 400,000 who have \$285,000,000.

Protection of Records.
In every city of magnitude there are all kinds of valuable records exposed to destruction by fire. The most practical people in the world are strangely remiss in this matter of protection of records that cannot be duplicated or replaced when once lost.—Buffalo News.

Is Happy Now.
"Gee, ain't it a great relief when you've been suffering from toothache to summon up your courage and go to a dentist and have it over with!"

Folly of Anger.
Consider how few things are worthy of anger, and you will wonder that any but fools should be in wrath.

Stops Hair Falling

Ayer's Hair Vigor, new improved formula, will certainly stop falling of the hair. Indeed, we believe it will always do this unless there is some disturbance of the general health. Then, a constitutional medicine may be necessary. Consult your physician about this.

Does not change the color of the hair.

Formula with each bottle. Show it to your doctor. Ask him about it, then do as he says.

The reason why Ayer's Hair Vigor stops falling hair is because it first destroys the germs which cause this trouble. After this is done, nature soon brings about a full recovery, restoring the hair and scalp to a perfectly healthy condition.

Made by the J. C. Ayer Co., Lowell, Mass.

Danger in Ambition.

The history of the past is useful only as used by one of America's purest patriots, Patrick Henry, as a light to guide us in our present path. The examples of ambition from Abolition down to our day are useful as indicating to us the characteristics of the ambition that is dangerous from that which is beneficial. The personal element too much emphasized is one of the most common notes of the ambition that is dangerous.

CLOSING OUT

500,000 rolls of fine wall paper at 3¢ per roll and up. Interior and exterior house paint, \$1.25 per gallon. Barn and roof paint, \$1.00 per gallon. Write for free samples of wall paper and colored card of [paints]. J. L. ASH, 39 Sixth street, San Francisco.

Society and Religion.

"Evidently it is not of real and given society that we are speaking when we explain by the action of society the religious attributes of the human soul. It is of ideal society, of society in so far as it strives after that, that justice, that happiness, that truth, that superior harmony, of which religion is the expression."—E. Boutroux.

Free to Our Readers

Write Murine Eye Remedy Co., Chicago, for 4-page illustrated Eye Book Free. Write all about Your Eye Trouble and they will advise as to the Proper Application of the Murine Eye Remedies in Your Special Case. Your Druggist will tell you that Murine Relieves Sore Eyes, Strengthens Weak Eyes, Doesn't Smart, Soothes Eye Pain, and sells for 50c. Try It in Your Eyes and in Baby's Eyes for Sore Eyelids and Granulation.

A Boy's Question.

At times Johnny seems as if he were a hundred years old. He has a quaint, bird-like way of cocking his head on one side, and asking a question that appears to be the result of years of study. If I could answer some of those questions, I should solve the darkest mysteries of life and death.—T. B. Aldrich.

Bud Doble

The greatest of all horsemen, says: "In my 40 years' experience with horses I have found Spohn's Distemper cure the most successful of all remedies for the horses. It is the greatest blood purifier." Bottle, 50c, and \$1.00. Druggists can supply you, or manufacturers. Agents wanted. Send for Free book. Spohn Medical Co., Spec. Contagious Diseases, Goshen, Ind.

Raise Fine Mules in China.

North China is noted for raising the best mules in the middle kingdom. In Pekin one will see mules quite as good in every respect as the Missouri and Kentucky product. The finest are employed by Chinese officers and other wealthy men to draw their "Pekin carts."

Dr. Pierce's Pellets, small, sugar-coated, easy to take as candy, regulate and invigorate stomach, liver and bowels. Do not gripe.

Siamese Stockings.

In Siamese men of the high and middle classes as well as women wear long cotton stockings reaching high above the knee.

Queer Fact in Nature.

The tallest and shortest people of Europe, the Norwegian and the Lapps, live side by side.

SICK? TIRED? WEAK?

If this describes your condition, then you are, indeed in bad shape and in need of help. Just get a bottle of

HOSTETTER'S STOMACH BITTERS

today and see how quickly your health will improve. It restores the appetite, perfects digestion and tones the entire system.

POWER FROM RAINFALL

WATER OF MONSOON SEASONS WILL BE UTILIZED.

Indian Company Plans to Construct Three Immense Reservoirs and to Develop 40,000 Horsepower of Electric Energy.

Owing to the irregularity of the amount of water in the rivers of India uninterrupted power from them for industrial purposes cannot be depended upon. During the monsoon season, from the middle of June to the middle of September, for instance, the average rainfall at Lanouli, on the west coast, is 175 inches, although sometimes greatly exceeding that amount. During the other nine months there is scarcely any rain.

Soon after the opening of the present century the plan of storing water and using it for industrial purposes was conceived, and after a thorough investigation by engineers, native capital to the amount of \$6,486,666 was raised, and on November 7, 1910, the Tata Hydroelectric Power and Supply company was incorporated.

It is planned to erect three lakes or reservoirs. The Lanouli reservoir, which will store water to be used during the long breaks of rainfall in the monsoon season, will approximate 100 acres, formed by a dam 3,800 feet long and 26 feet high, with a capacity of 380,000,000 cubic feet.

The Walwhan lake, situated about one and one-half miles from Lanouli, will be formed between two spurs of hills by a dam 4,500 feet long and 68 feet high. The area of the lake will be two and one-half square miles, with a capacity of 2,600,000 feet of water. The dam will be of solid masonry, fitted with sluices.

Later on a third reservoir will be constructed beyond Walwhan lake, with which it will be connected by a tunnel nearly a mile long running through the dividing ridges of steep hills, which will form a watershed 1,200 feet above the level of the valley. This reservoir will have an area of 3,174 acres, or nearly five square miles, with a capacity of 7,000,000 cubic feet of water, which, after traversing a distance of four miles, will be led through masonry ducts from the lakes to a fore bay, 2,040 feet above the sea level. There it will enter pipes six feet in diameter and run down steep slopes and precipices to Khopoli, where the generating station will be located 200 feet above sea level. The head will be 1,730 feet, and the static pressure 680 pounds per square inch. This generating station is 90 miles from Bombay, where the electric energy, estimated at 40,000 horse power, will be used for manufacturing purposes.

No Hope For Him.

"Do you object to me because I am prematurely bald?" he asked after she had refused for the third time to promise to be his wife.

"No, it isn't that," she replied. "You could of course hide your baldness by wearing a wig."

"Then what is it? There is some reason why you will not be mine. Tell me what it is. If it is anything I can possibly change or overcome I will do it."

"I'm sorry, but it is something you cannot possibly overcome without losing my love."

"You make the thing more mysterious. Please tell me what it is? I must know."

"Well, if I must I'll tell you. Your ears stick out so that they get on my nerves; but if you were to have them amputated I shouldn't care for you at all."

A merchant advertises because he wants your trade. He will make it worth your while to patronize him.

Figuring.

"Do you think dissolving your big monopoly will add to the expense of your business?"

"Certainly," replied Mr. Dustin Stax. "The readjustment of accounts will call for a lot of extra bookkeepers."

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Disliked Cinematograph.

While a performing tigress was being put through her tricks recently by her tamer Hervemann in front of a cinematograph at Nice, France, she displayed the utmost resentment at seeing the apparatus leveled in her direction. Failing to get at the instrument or its operator, she turned on the trainer and mauled him severely.

Examine Signatures.

A number of the larger banking institutions employ from one to half a dozen men whose sole duty is to examine every check that comes in through the clearing house, and vouch for the genuineness of the signatures.

Palm Wine's Many Uses.

In addition to being a beverage, palm wine may be used as a yeast, an insecticide, and a disinfectant, and it also will remove rust from metals.

The Morning Run.

Knicker—How far are you from the station? Suburbs—Exactly a cup of coffee and an egg, dear boy.—Puck.

PUTNAM FADELESS DYES

Colors more goods brighter and faster colors than any other dye. One 10c package colors silk, wool and cotton equally well and is guaranteed to give perfect results. Ask dealer, or we will send post paid at 10c a package. Write for free booklet how to dye bleach and mix colors. MORROE DRUG CO., Quincy, Illinois.

THE HEART

If the blood is poor and filled with the poisons from diseased kidneys or inactive liver, the heart is not only starved but poisoned as well. There are many conditions due to impure blood—such as dropsy, fainting spells, nervous debility or the many atrocious conditions, ulcers, "fever-sores," white swellings, etc. All can be overcome and cured by

Dr. Pierce's Golden Medical Discovery

This supplies pure blood—by aiding digestion, increasing assimilation and imparting tone to the whole circulatory system. Its a heart tonic and a great deal more, having an alternative action on the liver and kidneys, it helps to eliminate the poisons from the blood.

To enrich the blood and increase the red blood corpuscles, thereby feeding the nerves on rich red blood and doing away with nervous irritability, take Dr. Pierce's Golden Medical Discovery and do not permit a dishonest dealer to insult your intelligence with the "just as good kind." The "Discovery" has 40 years of cures behind it and contains no alcohol or narcotics. Ingredients plainly printed on wrapper.

Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of wrapping and mailing only. Send 31 one-cent stamps for the French cloth-bound book. Address: Dr. R. V. Pierce, Buffalo, N. Y.

Keyless Lock.

Locks of every imaginable kind have been invented, but there is now on the market a keyless door lock that is rapidly taking the place of the lock of the old style. Those keyless locks do not appear, at a glance, to differ greatly from the ordinary lock. They have a fancy plate and a knob, and they can be placed on any door. Instead of the key and keyhole, however, there is a particular bit of mechanism beneath the knob, with four to six little levers, which can be pressed or raised to unlock the door. The owner or person who has a right to enter can be given one or more of these little levers, one or more times, just as may be arranged, will release the bolt, and the door will open. The closing of the door will lock it, and a certain lever will release it if it is worked from the inside. Numerous combinations may be had and these can be changed at any time. Keyless padlocks are also on the market. They have combinations that can be set in as many as 38,000 different ways, making it difficult for a person not acquainted with it to unlock the combination lock.—Harper's Weekly.

EVERY WOMAN WILL BE INTERESTED.

There has recently been discovered an aromatic pleasant herb cure for woman's ills, called Mother Gray's AROMATIC LEAF. It is the only certain regulator. Cures female Weaknesses and Backache, Kidney, Bladder and Urinary troubles. At all Drugists or by mail 50c. Sample FREE. Address the Mother Gray Co., Le Roy, N. Y.

Unique Example of Thrift.

By dint of extraordinary saving an octogenarian woman named Enzler, who has just died in South Germany, has achieved a record. The woman, the widow of a railway station master, had been blind since her thirty-eighth year. Many years ago she arranged with her housekeeper that they should between them spend only twenty cents a day for all their requirements. The woman's will has now revealed an estate of \$125,000.

A very good mouth wash that will harden the gums and prevent the growth of disease germs in the mouth. A few drops of Hamlin's Wizard Oil in a tablespoonful of water.

Must Prepare Bridal Dinner.

A quaint, old superstition in Iceland is that every bride must invite all her friends to a dinner in her own home, and every article of food must be prepared by the bride herself. If she is successful in pleasing her guests she not only receives praise for her own skill, but helps along her younger sisters, who are then assumed to be equally good at cooking, and consequently have a much better chance of getting married.

Rivulets and the Rivers.

All are to be men of genius in their degree—rivulets or rivers, it does not matter, so that the souls be clear and pure; not dead walls, encompassing dead heaps of things, known and numbered, but running waters in the sweet wilderness of things unnumbered and unknown, conscious only of the living banks, on which they partly refresh and partly reflect the flowers, and so pass on.—Ruskin: The Stones of Venice.

Worked Overtime.

"Yes," said Farmer Cornotssel, "I read every one of those speeches you printed in The Record."

"Did they benefit you?"

"Yes, sir. I won the \$2 Zeb Perkins bet that it couldn't be done."

An Indication.

"Is Blighiss the superior influence in his own house?" "I'm afraid not. He's one of those men who understand exactly what their wives are talking about when they describe what other women wear."

Be Happy.

We ought to be happy wherever we are, as being happy ourselves will make others happy, a good many times.

Change pastures often to give the grass a chance to start up fresh.

6% GOLD COUPON AND PROFIT PARTICIPATING BONDS.

Interest paid semi-annually. Profit paid yearly. You can buy one of these \$200.00 bonds for \$50.00 down and \$10.00 per month, receiving interest on the face value of the bond on the first payment.

We are owners of the beautiful townsite of Rockaway Beach, suburban to San Francisco, and only seven miles from the city limits. Cut this ad out and mail to us and we will send you pamphlets and explain more fully.

Name..... Address.....
921 Phelan Bldg., ROCKAWAY BEACH CO., San Francisco.

Kind of Dog to Own.

For best results one should get a young dog and teach him his future duties gradually. Never allow him to leave the homestead alone and you will never have a dog that strays. Never chain your dog; that is not necessary. Teach him his proper place and make him obey you upon gesture or word and he will not overstep his lines. Treat him like a brother, give him his food and cool water regularly and be kind to him and you will have a noble animal.—Rural Life.

If you use Eye Salve use the best. PETTIT'S EYE SALVE is the standard, is reliable and costs no more than inferior goods that are unknown. Used by Physicians and Oculists, helps where all others fail. It is not the TUBE or BOX that cures, it is the SALVE that does the work. Guaranteed by Howard Bros. under the Government Food and Drugs Act. Don't be deceived or misled. The only really antiseptic Eye Salve that has been in the market for years. Sold by Druggists throughout the known world.

The Moabite Stone. The "Real Moabite Stone" is a black basaltic block, unearthed at Diban in 1868, by Rev. F. A. Kleiv, 3.8 feet by 1.2 feet in dimensions, which contains 34 lines in the Phoenician language. These chronicle the result of Mesha King of Moab, from Ahab King of Israel. At least two replicas of this valuable stone have been made, but the original is still in the Louvre in Paris.

SAN FRANCISCO, Dec. 18.—The California Business Educators' Association will hold its Annual Convention at Santa Rosa, December 27-29. Mr. J. S. Sweet, Secretary of the Association, in a communication to T. B. Bridges, Manager of Heald's Business College of Oakland, states that preparations are being made in Santa Rosa to make the convention the most successful ever held by this organization. A number of noted men outside of the Association have been secured to address the members, and many interesting papers on practical education will be read.

Tiles Made by Saxons. In the north of Staffordshire, within the parish boundaries of Stoke-upon-Trent, lies the district called the Potteries. Though little is known of the earliest days of its history it is certain that tiles were made there by the Saxons, as some have been found during excavations made in recent times, and fragments of cooking and domestic utensils, probably of Roman origin were discovered there also.

COLDS CURED IN ONE DAY

As a rule, a few doses of Munyon's Cold Remedy will break up any cold and prevent pneumonia. It relieves the head, throat and lungs almost instantly. Price 25 cents at any druggist or sent postpaid.

If you need Medical advice write to Munyon's Doctors. They will carefully diagnose your case and give you advice by mail, absolutely free. Address Professor Munyon, 53d and Jefferson streets, Philadelphia, Pa.

Get Ready for Old Settler's Day

The 22d. of February is only two
months off. On that date Campbell people
will celebrate for the eighteenth time
in honor of the pioneers of this locality.
No doubt the committees are beginning
to plan for the coming celebration, but so
all may know who is who the secretary
of the last meeting wishes it announced
that Mr. R. K. Thomas is chairman and
authorized to call a general committee
meeting at his pleasure.

The Speaker committee consists of
of Professor J. Fred Smith, J. E. Palmer
and Rev. G. E. Atkinson.

Sidewalks Down Second Street

Work on the laying of sidewalks was
began this week on South Second street.
There will be a continuous walk from
Chas. Berry's corner to Rincon avenue
and thence to the west line of E. R.
Kennedy's home, excepting possibly the
street crossings. A majority of the prop-
erty holders will put down cement and
the others will lay a good gravel walk.

Let Golden West Cleaning and Dyeing
Co. do your work for you. Putnam's
are their agents in Campbell.

2nd Hand Motorcycles

We have a number of good
machines, taken in on exchange
for new models. Among them
are Merckels, Indians, Harley
Davisons, Excelsiors, Racycles,
Tourists, and others. These ma-
chines have all been carefully
overhauled and put into first-
class condition.

If you don't care to spend the
money for a new motorcycle,
get one of these for from \$40 up

We are now delivering 1912
FLANDERS motorcycles, and
will have the NEW INDIANS
by January 1.

SUMMONS

In the Superior Court of the State of California,
in and for the County of Santa Clara,
Ida Von Henn Burke, Plaintiff, vs. Leland Her-
bert Burke, Defendant.

Action Brought in the Superior Court of the State
of California in and for the County of Santa Clara,
and the Complaint filed in the office of the Clerk
of said County of Santa Clara on the 20th day of Octo-
ber, 1911.

The People of the State of California send greet-
ing to the Leland Herbert Burke, Defendant.
You are hereby directed to appear and answer
the Complaint in an action, entitled as above,
brought against you in the Superior Court of the
State of California, in and for the County of Santa
Clara, within ten days after service on you of this
summons, if served within this County, or within
thirty days if served elsewhere.

And you are hereby notified that unless you so
appear and answer as above required, the said
plaintiff will take judgment for any money or dam-
ages demanded in the Complaint as arising upon
contract, or will apply to the Court for any other
relief demanded in the Complaint.

Given under my hand and the seal of the Superi-
or Court of the State of California, in and for the
County of Santa Clara, this 20th day of October, A.
D. 1911.

HENRY A. PFISTER, Clerk.

L. D. BOHNETT,
Attorney for Plaintiff.

9. Song, Miss Collins Class.
10. Christmas Pictures, "The Bird's
Christmas Carol" (with Stereopticon.)
11. Song, by Boys.
12. Santa Claus.

Millions in It—Another Cat Farm

A brilliant plan for getting rich is be-
ing worked out by an enthusiastic pro-
moter. Only the chance to buy stock in
it ("telegraph your order!") remains.
The company is to operate a large cat
ranch near Oakland, California. To
start with, the promoter will collect
about 1,000,000 cats. Each cat averages
twelve kittens a year. The skins will
run from 10 cents for the white ones to
75 cents for the pure black. This will
give 12,000,000 skins a year to sell at
an average of 30 cents apiece, making a
revenue of about \$10,000 a day gross.
A man can skin fifty cats per day for \$2.
It will take one hundred men to operate
the ranch, and therefore the net profit
will thus be \$9,800 per day. The cats
will feed on rats and a rat ranch will be
started next door. The rats multiply
four times as fast as cats. One million
rats will give four rats per day for each
cat. The rats will feed on the carcasses
of the cats from which the skins have
been taken, giving each rat a fourth of a
cat. The business will be self-support-
ing and automatic. The cats will eat the
rats and the rats will eat the cats, and
the company will get the skins. Tele-
graph your order.—Collier's Weekly.

Do It Yourself

Don't ask the editor to take up your
personal grouch against things that you
believe to be evils or that annoy you but
when you think that such articles are
necessary just write them up in your
best style, sign your name to the article
and send it in, and if there is any merit
in the question it will be printed, with
your name at the bottom so that you will
have all the glory, and the editor will
not get a licking. If you are too much
of a coward to do that, do not blame the
editor if he declines to take the blame.

The Los Gatos Chamber of Commerce
at its last meeting decided to admit the
women to membership.

\$100 Reward, \$100

The readers of this paper will be
pleased to learn that there is at least one
dreaded disease that science has been
able to cure in all its stages, and that is
Catarrh. Hall's Catarrh Cure is the only
positive cure now known to the medical
fraternity. Catarrh being a constitutional
disease, requires a constitutional treat-
ment. Hall's Catarrh Cure is taken in-
ternally, acting directly upon the blood
and mucous surfaces of the system,
thereby destroying the foundation of the
disease, and giving the patient strength
by building up the constitution and as-
sisting nature in doing its work. The
proprietors have so much faith in its cur-
ative powers that they offer One Hundred
Dollars for any case that it fails to cure.
Send for list of testimonials.
Address F. J. CHENEY & CO., Toledo,
O. Sold by all Druggists, 75c. Take
Hall's Family Pills for constipation.

RIGHT NOW?

We need more room for our opti-
cal business. To make room we
must close out most of our Watches
Clocks, Silverware and Jewelry.
To do this for the next two weeks
we shall make bottom prices on all
goods. Trading stamps.

WANTED

A Progressive Citizen of North Central

Avenue Who Will Start the Move-

ment for Better Sidewalks

It is hoped that the residents of North
Central avenue—the second principal
street of the town—will soon get imbued
with the spirit of improvement and put
down some cement sidewalks. On the
east side of the street there is but one
piece of walk north of the Realty Com-
pany property, and that a good wide
cement pavement in front of Chas. Sul-
ter's place. On the west side, Dr.
Cooper, the Congregational church, a
part of J. Fablinger's place, and Roy
Lane's in the next block are the only
places out of the mud. If some pro-
gressive citizen would start the move-
ment others would no doubt follow.

Congregational Church

There will be special Christmas Ser-
vices both morning and evening. In the
morning the pastor will speak on the
theme "No room in the Inn" and will al-
so tell an original Christmas story of the
mountains to the boys and girls.

MUSIC

The choir will sing a Christmas Carol
"Ring Merry Bells", by Fisher, and two
anthems "The Hush of Night Hath Fallen",
by William Speake, and "Come
Near Ye Nations", by Watson. Mr.
Alex Adam, a favorite tenor of this com-
munity, will sing "The Birthday of a
King", by Neidlinger.

In the evening will be a Christmas
Story and Song Service, Mrs. Florence
Morse Kingsley has written a most de-
lightful Christmas story which has been
arranged with special music. One of
the pieces of music is the Chantet the
Priests sang every morning from the
battlements of the Temple at Jerusalem
as the sun arose over the mountains.
One thing that adds interest to the eve-
ning service is that Mrs. Kingsley's
Mother and Rev. Mr. Atkinson's Mother
were classmates and roommates at Ober-
lin years ago.

A most cordial welcome is extended to
all who have no church home to worship
with us. Come and enjoy our Christmas
Services with us.

GEO. E. ATKINSON, Pastor.

Fraternal Aid Officers

Palm Leaf Council No. 560 of The
Fraternal Aid Association met Saturday
evening, December 16th and elected
their officers for the ensuing year.

W. Copeland was elected President;
Mrs. Anna Sawyer, Vice President; J.
D. Sawyer, Past President; Secretary,
Mrs. S. J. Brandenburg; Treasurer, Mrs.
Jessie Campbell; Guide, Beulah Crow;
Chaplin, Mrs. Myra Payne; Observer,
Pearly Payne; Sentinel, J. Crawford;
Pianist, Mildred Keesling; Trustees, Mrs.
Mabel Henry and J. A. Weisendanger;
Reporter, Mrs. E. J. Gard.

The Campbell postoffice last Monday
afternoon sent out the largest mail in the
history of the office.

The Day of the Young Man is Not

Passed

There never has been a time when the
young man with the right stuff in him
had such an opportunity. But he must
be trained. He must know how to do
things, how to assume responsibility,
how to make himself count. A Heald
training is the thing. The Heald Busi-
ness Colleges have more positions open
than they have young men to fill them.
Write to HEALD'S Business College,
San Jose, right now. It will be your
start to success.

HEALD'S

Christian Science Services

In Odd Fellows' Hall every Sunday
morning at 11 o'clock. Subject for Decem-
ber 24—Christ Jesus. Sunday
School at 12:15. The public is cordially
invited.

The Question of Glasses

Are they needed or not?
The question is easily answered by
those who can't see well without them,
but for a great many who see well and
still suffer from the effect of eye-strain it
can only be decided after a careful ex-
amination. Such an examination I am
prepared to give you, and an honest
opinion as to what is needed. No op-
eration. No drugs. No glasses unless
necessary.

Holiday Provisions.....

A Mention of Good Things to Eat

Why not think over the table supplies you'll need, and send us an or-
der for them all at one time?

We can not only fill your order for groceries and provisions of all kinds
—but we'll save you money on crockery, glassware, and the important
things in which the good things must be served.

A large general merchandise store like this enjoys
many advantages that are shared with its patrons.
Buying in immense quantities and receiving mer-
chandise by the carload, we are able to effect
enormous savings, which are divided with those
who trade here. Do you get your share?

If you cannot come to our store, send your orders by mail.
Write for descriptions and quotations on anything you need.
We guarantee all orders to be filled satisfactorily.
